## About Us

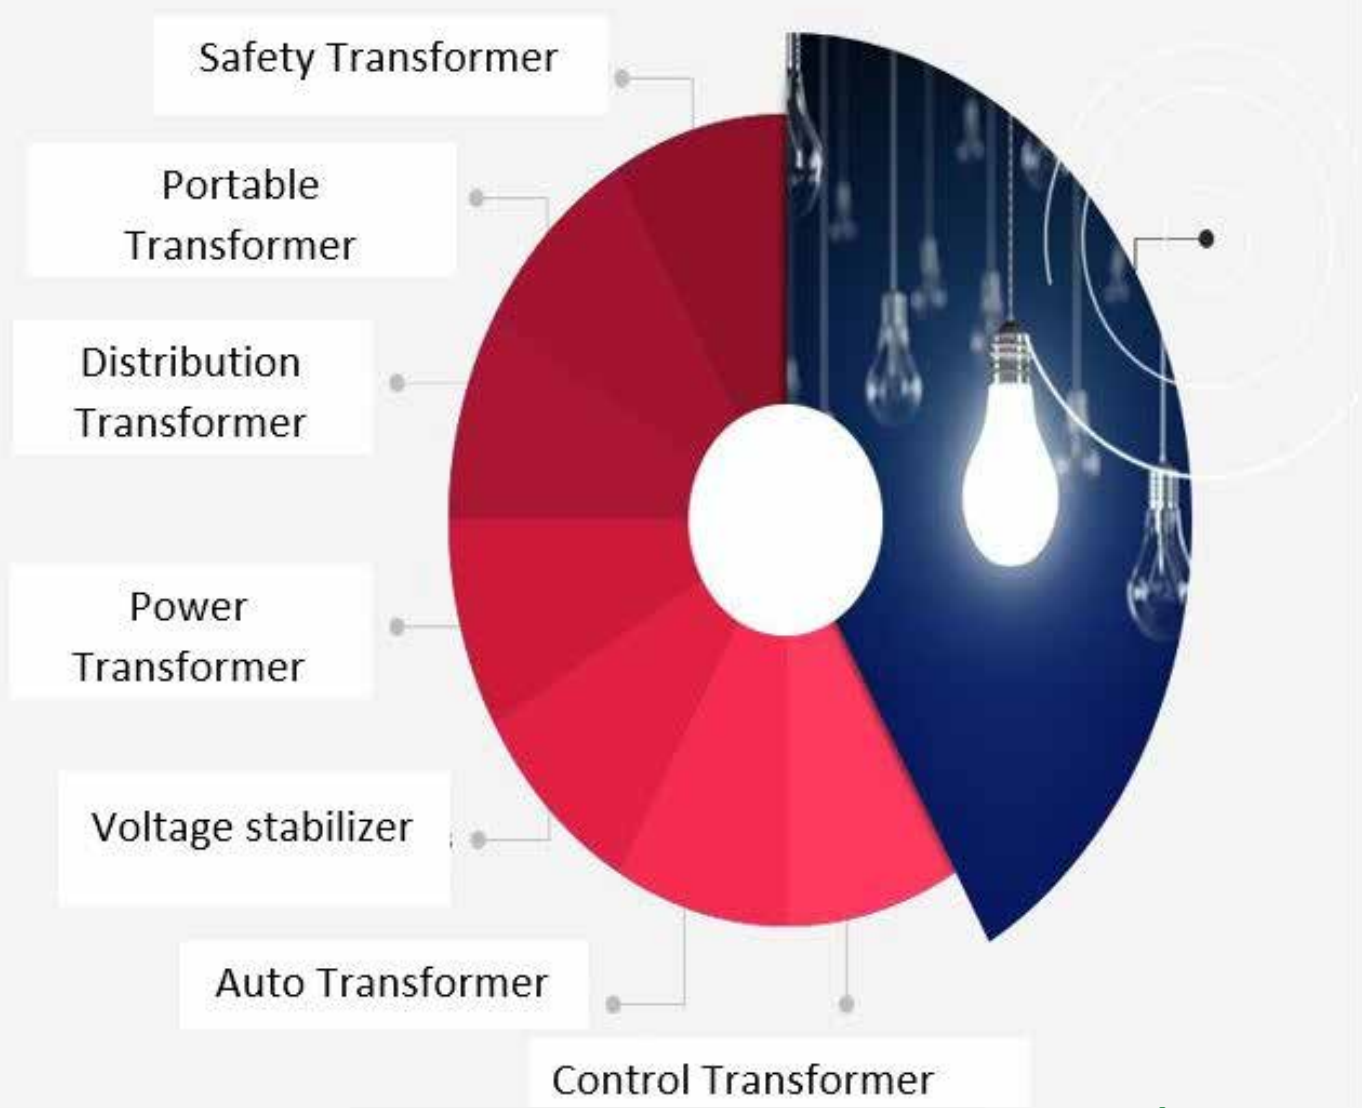

SYSTEM ELECT.TRANSFORMER IND. LLC is an Electrical Equipment Manufacturing company, its production facility located at P.O.Box: 45514, Sharjah, U.A.E. The products are manufactured under stringent quality control standards. Professionally managed, skilled workforce and state of the art manufacturing and testing facilities enable System Transformers to produce excellent quality products. Being a manufacturer and supplier, we have a commitment towards both our customers and the environment we work in. Considering all the possible circumstances we have ensured that each and every single process we carry out here at System Transformers do justice to the environment and its people.

## Vision

We want to achieve that by making sure that we leave no customer unsatisfied and constantly staying up-to-date and by following all the technological trends that are coming up. We want to achieve product innovation along with technological advancement and we also believe in doing business in the way that does not leave any permanent indent on the environment which means that we are focused on customer satisfaction, product Innovation, technological excellence and environmental consciousness.

## Our Mission

It is to deliver the product that is of the best quality and sustains the challenge of time and does not wear or tear easily. We also have a special team that is solely focused on the research. We provide products at competitive price keeping in mind the needs of the customers and have been adding more and more eco-friendly products to our product list. We have a technically strong and motivated team that focuses on all the trivial details to the major things and that is what makes us so different than the rest. The fact that we have a well-dedicated team that constantly works toward the betterment of the product, customer satisfaction and product innovation while remaining environment-friendly is the reason we have achieved this much and have become a well-known name in the industry.
